## **Dane County Youth Assessment 2012**

Since 1980, Dane County youth in grades 7-12 have been surveyed regarding their opinions, concerns, attitudes, behaviors and experiences. Survey results to provide essential data to educators, service providers, parents, policy-makers and funding bodies to inform grant writing, program development and public policy.

The Youth Assessment is a collaborative effort led by the Dane County Youth Commission in partnership with the United Way of Dane County, Public Health Madison & Dane County, the City of Madison, fifteen public school districts and one private school in Dane County.

### **Survey Development and Administration**

Project vendor K12 Associates and a committee of educators, public health professionals, project funders and parent representatives participated in development of the survey. The DCYA includes questions about both positive and risk behaviors across contexts of school, peer relations, family and community. The 2012 DCYA includes new questions on emerging youth issues while retaining questions from past surveys to measure trends. The survey includes items from the national Centers for Disease Control Youth Risk Behavior Survey and the Wisconsin Youth Risk Behavior Survey. This allows for comparison of Dane county data to state and national data. Extensive efforts are made to ensure that survey questions are clear and understandable. A Spanish version is available.

In January and February 2012, fifteen of sixteen public school districts and one private high school participated in the Dane County Youth Assessment. The survey was administered electronically at middle and high schools to students in regular and alternative school programs. Students with special needs or reading challenges were offered assistance in reading the survey. Student participation in the DCYA was voluntary and anonymous. Parents were notified four weeks in advance of survey administration, invited to review the survey at their school district office, and given the option to select their child out of the process. While the survey is available at school district offices for public review prior to its administration, distribution is restricted until after it is administered in order to preserve the integrity of student responses.

### **Data Analysis and Reports**

School districts attempt to survey all 7th-12th graders, with most districts capturing over 90%. Due to its size, the Madison Metropolitan School District (MMSD) uses sampling methods to survey approximately 50% of its 7th-12th graders. The data for the sample of MMSD students that participated in the survey is weighted to ensure representation of the entire MMSD student body of 7th-12th graders. This report presents student responses to survey questions as percentages of the *weighted* number for each item. Behavioral risk surveys using self-report methodology are widely used and have been proven to be valid and reliable. The large number of participants in the DCYA, the consistency of DCYA results with national trends, and consistency in findings from year to year supports the validity of the DCYA.

This report provides data tables for every survey question and countywide youth responses. The 2012 DCYA Overview Report summarizes and highlights key findings. Both reports are available on the Youth Commission web site at [www.co.dane.wi.us/humanservices/youth/youthhome.htm](http://www.co.dane.wi.us/humanservices/youth/youthhome.htm)

Subsequent analysis will be conducted by funding partners and researchers yielding additional information about Dane County youth including comparisons, trends and factors influencing youth behavior. Reports generated using DCYA data will be posted on the Youth Commission website at as they become available. All published reports may be printed without permission. Citation for any reporting of this data is “2012 Dane County Youth Assessment, Dane County Youth Commission, Madison, Wisconsin.”

## **Conclusion**

The 2012 Youth Assessment marks the sixth time the Youth Commission has coordinated an opportunity for 7th-12th grade youth in Dane County to voice their opinions, needs, concerns and interests. This effort provides the community with information and insight on youth trends. Although not the only source of information on what is impacting youth in our community, the Youth Assessment provides one very valuable resource to inform program and policy decisions. The data reflected in this report is encouraging in some areas and concerning in others. The Youth Commission and its partners hope that youth-serving agencies, community stakeholders, parents, policy makers, school districts and youth will use this and subsequent reports to appreciate where we have been, to recognize the successes and challenges of today and to create an even brighter future for Dane County.

## Using Report Tables

All tables in the following report are constructed in the same manner. Each table summarizes the responses for **one particular survey item** for either all high school students (grades 9-12) or all middle school students surveyed (Grades 7-8).

These tables are intended to summarize countywide survey responses in an easy-to-understand format. Below is a description of each element in the table.

*Grade levels cover in this table*

*% of all grades combined*

		4a. What is your current grade in school?				All Students
